

Can I send images in my messages?

You can attach a picture to any message if you select the "Attachment" icon on your [Send a Message](#) page:

The screenshot shows the 'Send Message' interface. At the top, there's a back arrow and the title 'Send Message'. Below this, there are two dropdown menus: 'From' with the value '+1 844 810 0014' and 'To' with the value 'All subscribers'. A 'Set Filter' link is next to the 'To' dropdown. The main section is labeled 'Message' and contains a text input field with the placeholder 'Organization Name (optional)' and another text input field with the placeholder 'Type in a message...'. Below the text input fields, there's a row of icons: a pencil icon (highlighted with a green 'Attachment' tooltip), a smiley face icon, a speech bubble icon, a list icon, a speech bubble with a checkmark icon, and a speech bubble with a plus icon. To the right of these icons, it says '160/1' and 'SMS'. Below the icons, there's a text input field with the placeholder 'Reply \'stop\' to opt-out'. At the bottom, there's a link 'Send a test message' and a link 'Not sure what to say? Our AI suggestion engine can help'. On the right side, there's an orange button that says 'SEND TO ALL SUBSCRIBERS' with a dropdown arrow.

Each MMS message counts as 3 messages sent per recipient.

If using the mobile app

If using the mobile app, you can select the "MMS" option in the "Type" section of the "Send a Message" page.

This converts your message into an MMS, which also increases your maximum character count to 1550 instead of 160. (Note that each MMS counts as 3 messages per recipient instead of 1, and MMS will be sent to your contacts through a different number than regular messages.)

Then tap the "choose file" box to select an image from your phone to send with your message.

Note: There is a size limit imposed of 0.51 MB from the mobile carriers and some devices do not accept PDF type files.
