## Can I send messages through API?

Sam Pelton - 2026-05-17 - [Comments \(0\)](#) - [Sending Messages](#)

Your account at Mobile Text Alerts comes with free SMS API access for developers to send out texts and manage your account.

You can view documentation for our SMS API [here](#). (You can view your account API key under [Settings](#)->Developer Settings if you have a paid account. If you are in a free trial account please [contact us](#) to receive your API key.)
