Can I send messages through API?

Sam Pelton - 2025-08-13 - Comments (0) - Sending Messages

Your account at Mobile Text Alerts comes with free SMS API access for developers to send out texts and manage your account.

You can view documentation for our SMS API here. (You can view your account API key under Settings-->Developer Settings if you have a paid account. If you are in a free trial account please contact us to receive your API key.)
