Desktop App for Google Chrome and Microsoft Edge

Alexis - 2025-05-30 - [Comments \(0\)](#) - [Other Features](#)

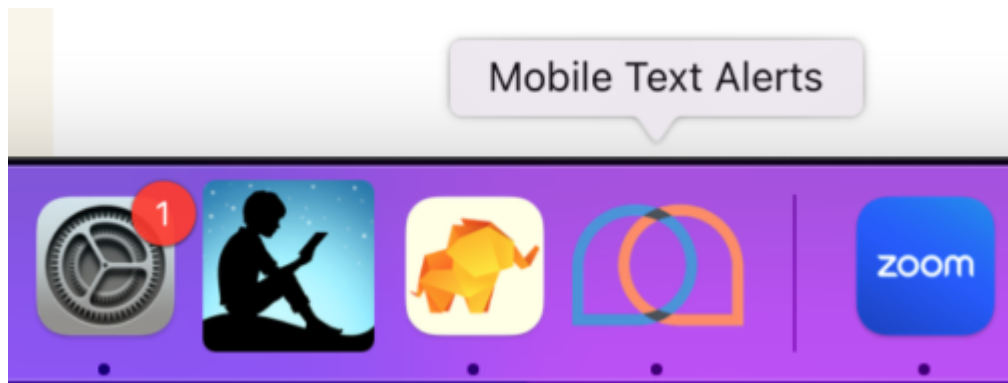

You can make accessing your online dashboard easier than ever by installing the desktop app for Google Chrome and Microsoft Edge web browsers.

All that you need to do in order to install this is [log in](#) to your online dashboard from a Chrome or Edge browser.

Once logged in, you can click the "3 dots" options icon in the top right side of your browser's screen. Then click "Install Mobile Text Alerts..." to install the app onto your desktop.

Then you'll be able to access the app directly from your desktop.

Clicking on the app icon will either take you directly to the login page or will open up your account dashboard (if you're already logged in).
