Procore Integration
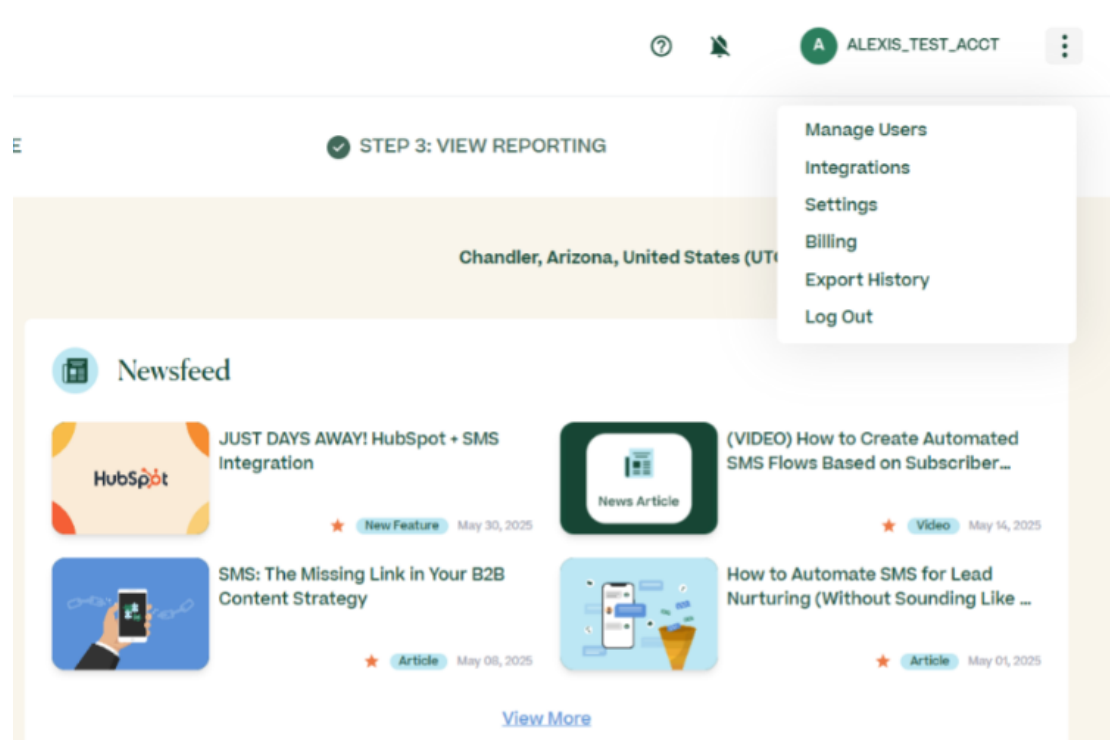

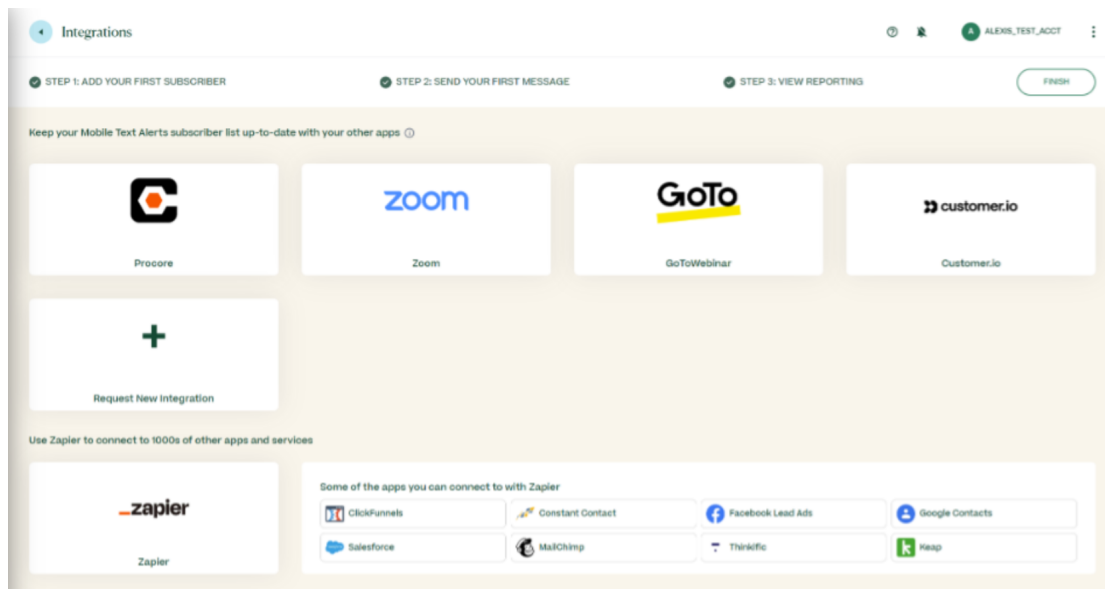

Alexis - 2025-05-30 - Comments (0) - Other Features

Procore users, you can add your contacts into your Mobile Text Alerts subscriber database with just a few clicks.
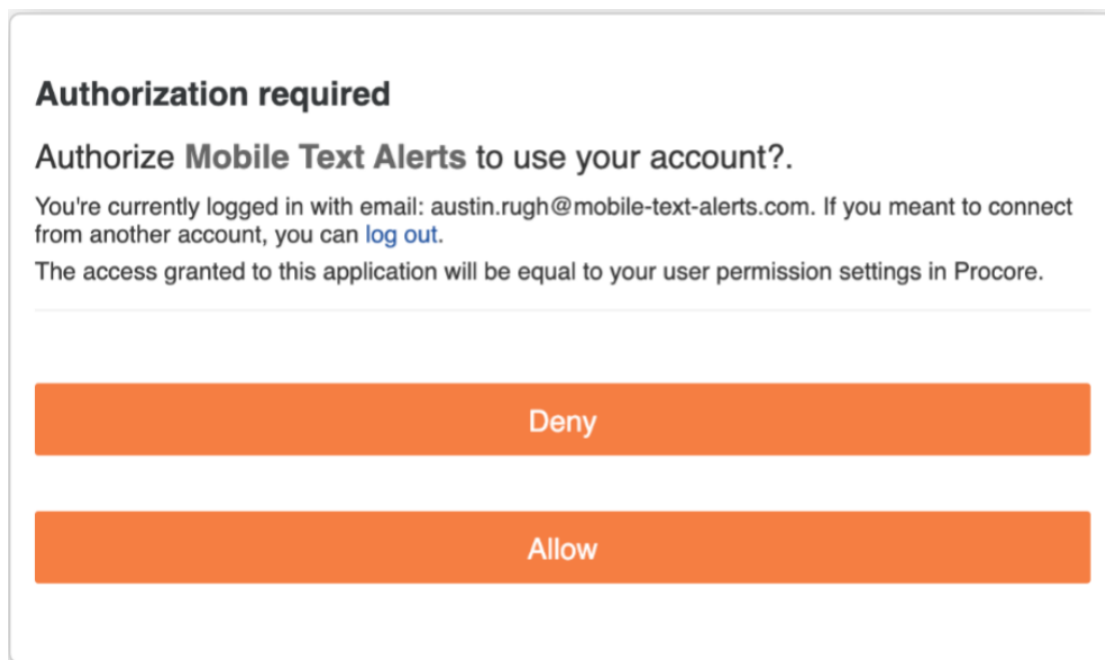

Here's how!

First, go to the Integrations tab:

Select "Procore" from the list of integrations:

It will then ask you to log into your Procore account. Once you do that, a screen will pop up asking if you would like to authorize Mobile Text Alerts to use your account. Be sure to select "Allow":

Once you're connected, the system will add in your Procore contacts to your Mobile Text Alerts subscriber list. Anytime you'd like to add in more contacts from Procore, you can go back to the Integrations page and select the Procore box again.

We hope you find this integration useful as you try to stay connected with your subscribers!
