

Sign-Up Page

Alexis Vejvoda - 2025-05-30 - Comments (0) - Popular Features

Your [SMS service](#) comes with a free sign-up page that allows people to subscribe to your texts by filling out a form online.

You can view and customize your sign-up page info under [Growth > Opt-in Forms](#):

Explore powerful tools designed to help you grow your audience effortlessly.

Keywords
Use opt-in keywords to let users subscribe to mass alerts by texting a specific word.

Opt-In Forms
Add a free embeddable component to your site for visitors to join your text list.

Chatbots
Enhance subscriber interactions with instant AI-generated replies.

Drip Campaigns
Automate messaging with scheduled texts to engage and retain subscribers.

From here you can click "Copy Link" to copy URL for your sign-up page so you can share it.

Click the "copy" icon next to the link to copy it so you share it in emails, social media posts, mailings, or anywhere else, and your audience can visit that link in order to sign up for your text alerts.

You can also toggle between "Edit" and "Preview" to change how you view the sign-up page preview for the purposes of customizing the page.

(The "Preview" shows you an example of what your sign-up page will look like when people visit your link.)

You can click the iFrame or HTML tabs to view HTML code you can use to embed the sign-up page on your own site:

The code listed when you click "iFrame" is dynamic. This means if you embed it on your site, it will automatically reflect any future changes you make to customize your sign-up page.

The code displayed upon clicking "HTML" is static so if you embed it, any future changes you make to your sign-up page will not apply automatically. However, this code gives you more freedom to make changes to the code if you would like.

You can also customize various aspects of your sign-up page, including:

- Displaying your company/organization's name
- Uploading a custom logo
- Viewing the auto-response message people receive when they sign up
- Designating the "groups" (organized segments you've created on your account) that you'd like people to be able to sign up for
- Designating any custom attributes you'd like to display (these must first be added in your account's [Manage Custom Attributes](#) tab)

- Changing the page's colors
- Selecting whether or not you want certain fields hidden or required

You can also click the drop-down that says "English" to view a Spanish-language version of the sign-up page. You can then copy and share the direct link for the Spanish-language version of the page. Your audience will also have the option to select to view the Spanish-language version when they access the English-language sign-up page.

Click "Save All Changes" toward the top to save any changes you make!
