

SmartSMS Image Generator (AI Tool)

Alexis Vejvoda - 2025-05-27 - Comments (0) - Popular Features

People love images - but coming up with image content for your text messages can be difficult.

That's where the SmartSMS Image Generator tool comes in.

The Image Generator uses the power of AI to automatically create images for you based on prompts you give.

How It Works

When setting up your message content on the Send a Message page, click the paper clip icon and select "Generate Image" to open up the tool.

Then you type out what kind of image you're looking for into the prompt box and click "Submit."

If you like the generated image, you can click "Accept" and the image will be attached to the text message you're trying to send. Otherwise you can edit your prompt and resubmit, or click "Cancel" to exit out of Image Generator tool.
