Subscribers (Mobile App)

C.J - 2025-05-27 - Comments (0) - App Pages

Need a convenient way to view and manage your SMS app contacts?

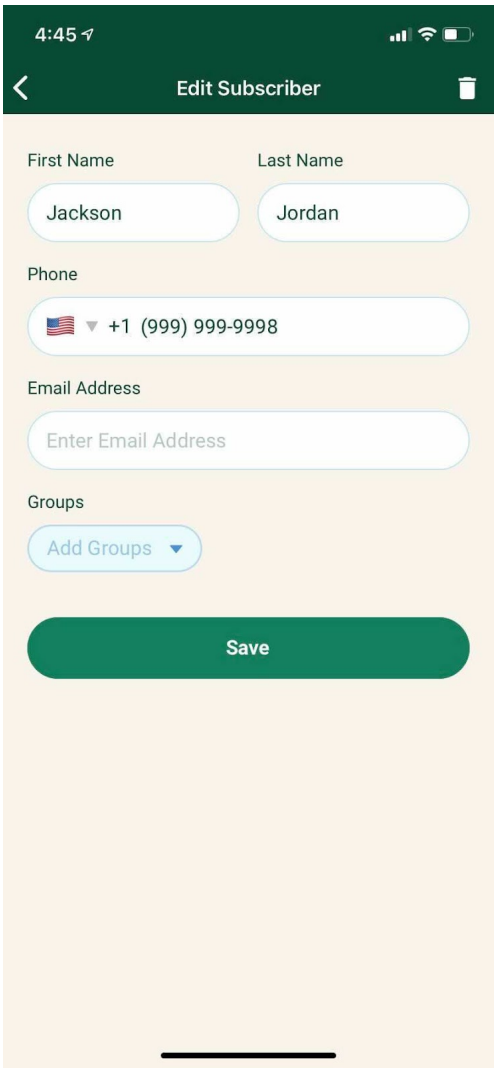

The Subscribers tab on your mobile app will allow you to access and manage your subscribers and groups:

Editing and deleting a subscriber

Click on one of the subscriber entries to edit that entry. You can input name, phone number, email address, and assign the subscriber to a group on your

account:

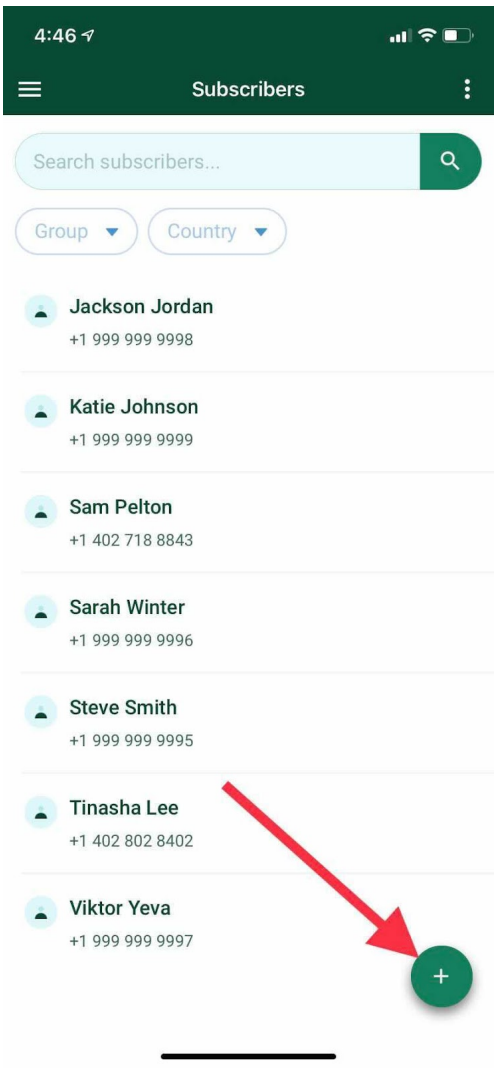

Click "Save" to save any changes!

You can delete a subscriber entry by selecting the trash bin icon on the top right side of your screen.

Adding a subscriber

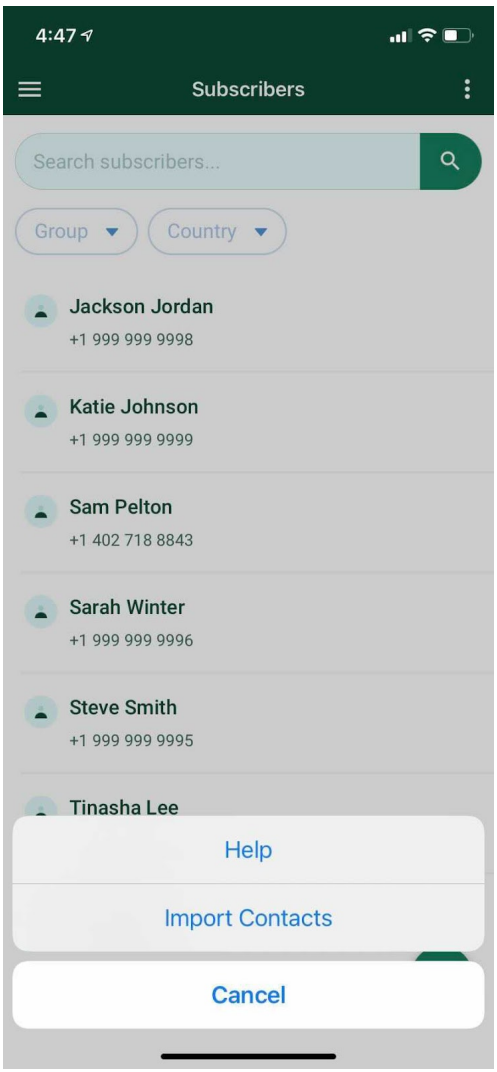

Click the "+" icon on the bottom right side of the screen to add a new subscriber:

(All the info is optional when creating a new subscriber, except either a phone number or an email address must be entered.)

Importing contacts

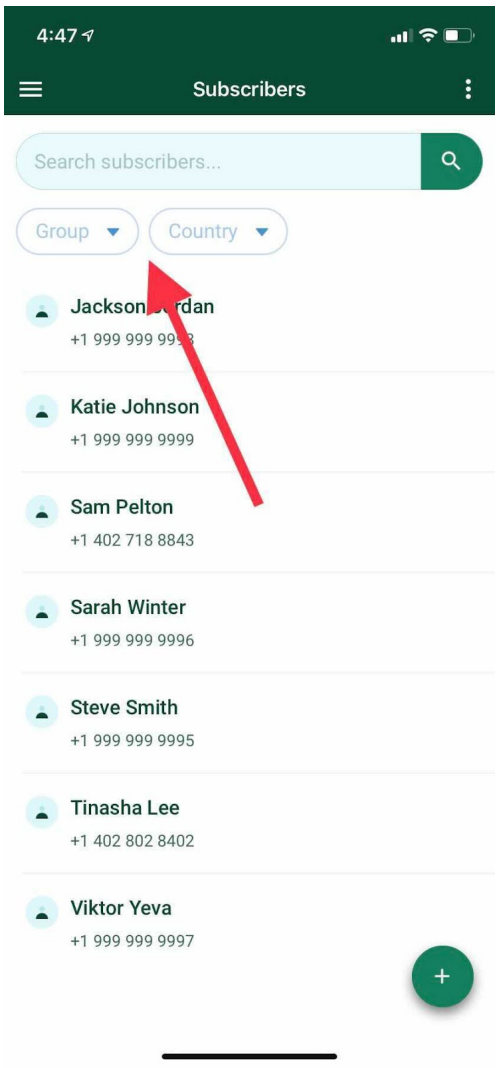

You can click the icon in the top right corner to reveal the "Import Contacts" option:

This option will import all of your phone contacts and add them as subscribers on your account.

Filtering subscribers

To filter your subscriber list, tap the first icon on the top right side of your screen as designated in the screenshot below:

This option will allow you to only view subscribers belonging to a particular group and/or country (or subscribers that aren't in any group).
